Vivo s1 new update android 11

Continue

Continue

Something went wrong. Wait a moment and try again. Vivo S1 and Vivo V15 Pro smartphones are reportedly getting the Android 11-based Funtouch OS 11 update. Both the smartphones are receiving the update through greyscale testing, which means only a limited number of users will be able to experience the latest OS upgrade initially. Vivo hasn't shared any details about when a stable update for both the smartphones will be rolled out for all users. It is expected to arrive soon after all the bugs are wiped off during the testing rounds.According to a report by PiunikaWeb, Vivo has started rolling out third-party testing for its Android 11-based Funtouch OS 11 update for Vivo S1 and Vivo V15 Pro smartphones. There has been no information regarding the build number for the update, however, it is expected to be more than 3GB in size. It will also be the last major OS upgrade for these smartphones as Vivo typically provides two OS upgrades for its handsets as both of them were launched with Android 9 Pie in 2019. The phones received the Android 10 update last year.Vivo V15 Pro was launched in February 2019 and features a 6.39-inch full-HD+ Ultra FullView Super AMOLED display. Under the hood, it has a Snapdragon 675 AIE SoC, coupled with 6GB of RAM and 128 GB of onboard storage. For photography, it has a triple rear camera setup with a 48-megapixel primary shooter. For selfies, there is a 32-megapixel camera placed within a pop-up module. It packs a 3,700mAh battery that supports Vivo's Dual Engine fast charging technology.On the other hand, Vivo S1 was launched in August 2019 and features a 6.38-inch full-HD+ Super AMOLED display with a waterdrop-style notch. It is powered by a MediaTek Helio P65 MT6768 SoC paired with up to 6GB RAM along with up to 128GB of onboard storage. It has a triple rear camera setup with a 16-megapixel primary sensor. At the front, there is a 32-megapixel selfie camera. It packs a 4,500mAh battery with 18W fast charging support.In other Vivo-related news, the company recently updated two of its smartphones to Android 11-based Funtouch OS 11. Vivo V17 received a stable version of the update, while Vivo V17 Pro's update was undergoing greyscale testing earlier this month.Which is the bestselling Vivo smartphone in India? Why has Vivo not been making premium phones? We interviewed Vivo's director of brand strategy Nipun Marya to find out, and to talk about the company's strategy in India going forward. We discussed this on Orbital, our weekly technology podcast, which you can subscribe to via Apple Podcasts or RSS, download the episode, or just hit the play button below. Download Vivo is one of the leading smartphone manufacturers around the globe. Every year they launch several smartphones in different price categories, and they push out updates for these smartphones every once in a while. While some manufacturers slack on pushing major Android updates to their smartphones, Vivo is not one of them. Last year Vivo was one of the first OEMs to release the beta build of Android 11 when Google was testing the beta build in their Pixel devices. Later last year, several Vivo smartphones received the Android 11 stable update. This year Vivo has also joined the Android 12 beta program. Vivo Android 12 Update Tracker February 12: Vivo X70 Pro users are reportedly getting an Android 12 based Funtouch OS update in India. The build carries a size of more than 5GB. January 27: Vivo is rolling out an Android 12-based FuntouchOS 12 stable build for Vivo Y51A devices. January 19: Vivo is releasing the Android 12 beta version for Vivo V21 in India. The update will roll out in batches. January 14: Android 12 for the Vivo Y72 5G will be released soon. The build is currently under greyscale testing in India. December 24: Vivo X60 is reportedly getting the Android 12 update in India. December 22: Vivo has rolled out the Android 12 update to the X60 Pro in several countries, including India. December 17: iQOO 7 Legend users are receiving the stable Android 12 update with the Funtouch OS 12 in India. December 13: iQOO Z3 Android 12 based Funtouch OS 12 update is rolling out in India with the build number PD2073BF_EX_A_6.72.7. December 04: Vivo is rolling out the Android 12 based Funtouch OS 12 update for iQOO 7 in India. November 20: Vivo has rolled out the first-ever Android 12 beta update for Vivo X70 Pro+ in India. October 22: Vivo's iQOO has released the Android 12 update beta rollout timeline. The iQOO 7, 7 Legend, Z3, and Z5 will be updated by the end of December. The iQOO 3 will receive it by the end of March. October 21: Vivo has announced the Android 12 Beta update timeline for India. Vivo X70 Pro+ will be the first smartphone to receive the beta towards the end of November 2021. Vivo X60 Pro+, X60 Pro, X60, V21, and Y72 5G users will get the update by December. Vivo X70 Pro, V21e, V20 2021, V20, Y21, Y51A, and Y31 are slated to get Android 12 beta in January 2022. In March 2022, older devices such as Vivo X50 Pro, X50, V20 Pro, V20 SE, Y33s, Y20G, Y53s, and Y12s will receive the beta update. Other smartphones such as Vivo V17 Pro, V17, S1 Pro, Y73, Y51, Y20, Y20i, and Y30 will receive the latest beta build in April 2022. October 20: iQOO shares its Android 12 rollout timeline. The iQOO 7, iQOO Z3, and iQOO Z5 will be updated by the end of December 2021. The iQOO 3 will receive it by the end of March 2022. September 16: Vivo has silently launched Funtouch OS 12. However, complete information is yet to reveal by the company. May 19: Android 12 Beta for select Vivo users is now live through the Developer Preview Program. Currently, iQOO 7 Legend users can join the program. The company said that this build is only for developers to test the compatibility of apps with the next version of Android. Funtouch OS 12 Funtouch OS 12 is the custom Android skin from Vivo. It is based on the Android 12 operating system. It arrives as the successor to the Funtouch OS 11. It brings several new features such as redesigned widget system, Nano Music Player, and Extended RAM. However, the company may bring Android 12 based OriginOS(a replacement of Funtouch OS) to select markets. Android 11 is no longer the latest Android version. Google has already launched the beta build of Android 12 to give developers ample time to work on their applications and to make them compatible with the upcoming build of Android. We will get more information on this forthcoming Android version in Q4 2021. Release Date Following the developer preview build, Google has launched the beta build of Android 12 for the Pixel lineup. If Vivo continues in its footsteps from last year, we will see the beta build of Android 12 for some Vivo flagship devices in September 2021. Google will release the stable build of Android 12 on October 4, which is when OEMs will start working on their version of Android 12. Vivo will have the beta build even after Google releases the stable build of Android. They will eventually push out the stable version in the Q4 of 2021, much like what they did last year. Will my Vivo phones be eligible for Android 12? Vivo does not have a strict policy when it comes to Android updates. However, we have witnessed Vivo releasing two major Android updates to most of its smartphones in the past. The entry-level budget Vivo devices only received one major update, but the mid-range and flagship devices did receive two major updates. So Vivo devices that came with Android 10 or Android 11 out of the box are eligible for the Android 12 update. Based on this pattern, we have compiled a list of Vivo devices eligible for the upcoming Android update. These Vivo phones will likely get Android 12 with Funtouch OS 12 All the smartphones included in this list might not receive the Android 12 update if the company devices something else for a specific model. But if Vivo maintains its pattern, these are the devices that will receive the stable build of Android 12 at the end of 2021 and the start of 2022. This by no means is an official announcement from the company. This is just a speculated list prepared by our team. If any new Vivo device launches with Android 11 now, you can also add that device to this list. Vivo S1 started receiving Funtouch OS 11 based on Android 11 update. Vivo S1 was announced on July 2019 based on Funtouch OS 9 based on Android 9.0. And last year it received Funtouch OS 10 based on Android 10. And Now its getting its 2nd Major Android 11 update and Probably the last major update based on Vivo Update track record. Although Vivo Have Now improved its update schedule much better than prior years.It currently rolling out for limited users. The Update size is around 3.27 GB with Build Number EX_A_8.71.10. It features number of changes and also improves system stability. The Security Patch also jumps to March Security patch. To check out FunTouch OS 11 Features check out Here.As of Now (22 April) Known issues include some stutters here and there, Auto Rotate Not working properly and for some users Amazon Prime Not working. Hopefully this should be fixed soon as this is a limited roll out.As usual the update is rolling out to a small number of users. And should be getting wider roll out in coming weeks. As usual always Backup important files before updates for your safety.To check update manually goto Settings > System Update > Check.report this ad Following the launch of Android 12 back in October, the majority of smartphone brands have revealed their custom UI based on Android 12. Vivo, who recently revealed the FunTouch OS 12 for the Vivo and iQOO phones, has rolled out a timeline and many features of their custom skin. The new Android skin update from Vivo gets some major incremental upgrades to offer a seamless experience. The company has also confirmed a list of devices that will get the FunTouch OS 12 update in India. We will be talking about the top features of FunTouch OS 12 and devices that will get the FunTouch OS 12 update with its release date. Also Read: Android 12 Update Tracker: List of Samsung, OnePlus, Xiaomi Mi, Redmi, POCO, OPPO, Vivo, Realme Devices Eligible FunTouch OS 12 Update Release Date Vivo previously announced that it will start rolling out FunTouch OS 12 at the end of November 2021. As of now, a bunch of Vivo devices have received the update including the Vivo X70 Pro+, Vivo X60, iQOO Z3 and a few others. Vivo also announced that the rollout will continue until the end of April 2022. The majority of the Vivo devices will receive the FunTouch OS 12 update in Q2, 2022. FunTouch OS 12 Top Features Vivo's FunTouch OS 12 does not get a major design overhaul but instead some incremental upgrades to offer a seamless user experience. Vivo has confirmed some of the top features of FunTouch OS 12 such as redesigned UI, new widgets, extended RAM, and many more. Let's discuss in detail: New UI Design Vivo has revealed that its UI will get a new makeover in FunTouch OS 12. The new update brings a new user interface design and more customisable options. Also Read: MIUI 13 Update Tracker: India Release Date, Top Features, List of Compatible Xiaomi Mi, Redmi and POCO Mobiles Small Widgets To get more information on the home screen, Vivo will be introducing small widgets in the FunTouch OS 12 so that one can fit more widgets into the homepage and get more info at a glance. Vivo also will be adding new widgets to its Android-based custom skin. Extended RAM Extended RAM is the marketing term Vivo uses for Virtual RAM. The FunTouch OS 12 allows Vivo phones to increase their RAM space by up to 4GB of RAM so that one can enjoy a seamless experience. It allocates some part of the ROM storage to the RAM and hence increases RAM. Nano Music Player FunTouch OS 12 will have a nano music player on the homepage through which one will be able to control their music playback easily. It will be a sort of widget on the homepage through which one will be able to control their Spotify or JOOX playlist. Stickers The company has also introduced a new feature known as Stickers with FunTouch OS 12. The new feature allows users to select handy stickers on the home page for different functions like water intake, reminders, notes, and more. One can create custom backgrounds and colours for these Stickers. FunTouch OS 12 Update Smartphones: List of Compatible Devices and Rollout Schedule Unlike other smartphone manufacturers, Vivo has not been consistent in updating Vivo users on when they will get the Android 12 update. Based on the user reports, below is the list of devices that have received the FunTouch OS 12 update - Vivo X70 Pro+ Vivo X60 iQOO Z3 iQOO 7 iQOO 7 Legend Here's a list of Vivo devices that will get the FunTouch OS 12 update in the coming months. Also Read: Android 12 Update Tracker: Release Date, Top Features, List of Compatible Galaxy Smartphones and Tablets December 2021 Vivo X70 Pro+ Vivo X60 Pro+ Vivo X60 Pro Vivo V21 Vivo Y72 5G January, 2022 Vivo X70 Pro Vivo V21e Vivo V20 2021 Vivo V20 Vivo Y20 Vivo Y21 Vivo Y51A Vivo Y31 March, 2022 Vivo X50 Vivo X50 Pro Vivo V20 Pro Vivo V20 SE Vivo Y33s Vivo Y20G Vivo Y53s Vivo Y12s April, 2022 Vivo V17 Pro Vivo V17 Vivo S1 Pro Vivo Y19 Vivo Y73 Vivo Y51 Vivo Y20 Vivo Y20i Vivo Y30 Also Read: Realme UI 3.0 Update Tracker: India Release Date, Top Features, List of Compatible Mobile Phones FunTouch OS 12 for iQOO Smartphones: List of Compatible Devices and Rollout Schedule iQOO smartphones in India also run on FunTouch OS and they are scheduled to receive the Android 12-based FunTouch OS update in India (June 13, 2022) Vivo has officially confirmed that it will be rolling out the Android 12 update to its budget-centric Vivo Y20 smartphone in India soon. The company has confirmed that the update is currently under greyscale testing and once all bugs are rectified, a larger rollout will begin.
